RETAILER SNAPSHOT

**Environmental Sustainability Commitment.** Buy-Low Foods achieved its commitment to remove all red-listed seafood in 2015 and has since committed to procuring products that are Recommended by Ocean Wise or rated either ‘Good Alternative’ or ‘Best Choice’ by Seafood Watch, or from fisheries and farms that are engaged in credible improvement projects. This commitment applies to all of Buy-Low’s fresh and frozen seafood products (see infographic below) sold in all its store banners, and is supported by an effective traceability policy. Uniquely among major Canadian retailers, Buy-Low Foods does not sell any open net-pen farmed Atlantic salmon due to sustainability concerns.

**Social Responsibility Commitment.** Buy-Low Foods’ commitment to social responsibility refers to credible international standards but does not include a traceability policy or timelines.

**Scope of Commitment.** See below for information on which types of products are included in the scope of Buy-Low Foods’ sustainable seafood policy.

**STEP 1: DOES THE RETAILER HAVE A COMPREHENSIVE COMMITMENT ON SUSTAINABLE SEAFOOD?**

If it looks like you are only seeing the score for one year it is because the score did not change from year to year.

**STEP ELEMENTS**
1.1 Has a publicly available commitment or policy to source more environmentally sustainable seafood

SCORING RATIONALE

Buy-Low Foods' Sustainable Seafood Reference Manual (unpublished, 2013) reports that its sustainable seafood commitment was to, by 2015, ensure that all fresh and frozen seafood were from sustainable and traceable sources, or were in a credible improvement project. The goal to remove all red-listed (as determined by Seafood Watch) seafood products from Buy-Low Foods' stores was achieved in 2015.

**STEP 6: DOES THE RETAILER SUPPORT IMPROVEMENTS IN FISHERIES AND AQUACULTURE?**

Does the retailer sell ‘Priority Seafood’ products (seafood that has high volume of sales in Canadian retail stores and that is generally not recommended by the Ocean Wise Seafood Program), and if so, do they support improvement and how?

The step score is based on the average of Step 6 key performance indicators (KPIs, or step elements) listed below; click the + signs for more detailed information.

Note that this Step was changed significantly in 2019 to introduce two additional ‘Support Improvement’ actions for each of the Priority Seafood products. This means that if a retailer was engaged in the same actions in 2019 as in 2018, and no more, their score will appear to have decreased. Additionally, KPIs 6.4 and 6.5 on other SeaChoice priority seafood products were generalized into a new KPI that allows retailers to showcase any other actions they are taking to support improvement of specific seafood products (besides shrimp, farmed salmon and skipjack), or to support improvements in seafood sustainability in general.

If it looks like you are only seeing the score for one year it is because the score did not change from year to year. Try clicking off the ‘June 2019’ button below the score bar.
