RETAILER SNAPSHOT

In 2013, Buy-Low Foods and Nesters Market (“Buy-Low”) committed to removing all red-listed seafood (from sources rated ‘Avoid’ by Seafood Watch) and replacing them with more sustainable alternatives. In 2015, Buy-Low became the first major retailer in North America to have achieved this. Buy-Low has committed to procuring all its fresh and frozen seafood products from sustainable (seafood Recommended by Ocean Wise or rated either ‘Good Alternative’ or ‘Best Choice’ by Seafood Watch) and traceable sources, or from fisheries/farms that are engaged in credible improvement projects. Uniquely among major Canadian retailers, Buy-Low does not sell any farmed Atlantic salmon due to sustainability concerns.

Buy-Low provides good staff training on seafood sustainability issues and its suppliers must sign a comprehensive Code of Conduct that commits them to providing products that are in line with Buy-Low’s environmental sustainability commitment. In 2019, Buy-Low formalized its social responsibility policy with suppliers by requiring them to sign a Supplier Code of Conduct on Social Responsibility.

In 2018, Buy-Low committed to increasing the information available to consumers on seafood labels by adding species’ scientific names and whether the product was wild or farmed, and in 2019 it committed to adding country/region of origin on as many fresh and frozen products as possible.

Buy-Low is supporting improvements in the production of farmed imported shrimp and prawn through preferential sourcing of eco-certified and Ocean Wise recommended products, and SeaChoice recommends that Buy-Low now take action to support improvements on other Priority Seafood commodities, such as Skipjack tuna.

In the process of developing this profile, SeaChoice corresponded with Glen Genereux, the Meat Buyer/Meat Merchandising Manager for Buy-Low Foods Ltd and Nesters Market, and Claire Dawson, Senior Accounts Representative at Ocean Wise.

**STEP 1: DOES THE RETAILER HAVE A COMPREHENSIVE COMMITMENT ON SUSTAINABLE SEAFOOD?**

Does the policy include time-bound objectives for addressing environmental issues, social concerns and traceability?

The step score is based on the average of Step 1 key performance indicators (KPIs, or step elements) listed below; click the + signs for more detailed information.

Note that the KPIs changed from 2018 to 2019 to move the assessment of retailers’ traceability commitments from a stand-alone KPI to a component of the scoring for the KPIs relating to environmental and social commitments.

If it looks like you are only seeing the score for one year it is because the score did not change from year to year. Try clicking off the ‘June 2019’ button below the score bar.

**STEP ELEMENTS**
1.1 Has a publicly available commitment or policy to source more environmentally sustainable seafood

SCORING RATIONALE

Buy-Low Foods’ Sustainable Seafood Reference Manual (unpublished, 2013) reports that its sustainable seafood commitment was to, by 2015, ensure that all fresh and frozen seafood were from sustainable and traceable sources, or were in a credible improvement project. The goal to remove all red-listed (as determined by Seafood Watch) seafood products from Buy-Low Foods’ stores was achieved in 2015.

**STEP 6: DOES THE RETAILER SUPPORT IMPROVEMENTS IN FISHERIES AND AQUACULTURE?**

Does the retailer sell 'Priority Seafood' products (seafood that has high volume of sales in Canadian retail stores and that is generally not recommended by the Ocean Wise Seafood Program), and if so, do they support improvement and how?

The step score is based on the average of Step 6 key performance indicators (KPIs, or step elements) listed below; click the + signs for more detailed information.

Note that this Step was changed significantly in 2019 to introduce two additional 'Support Improvement' actions for each of the Priority Seafood products. This means that if a retailer was engaged in the same actions in 2019 as in 2018, and no more, their score will appear to have decreased. Additionally, KPIs 6.4 and 6.5 on other SeaChoice priority seafood products were generalized into a new KPI that allows retailers to showcase any other actions they are taking to support improvement of specific seafood products (besides shrimp, farmed salmon and skipjack), or to support improvements in seafood sustainability in general.
